HighSpeed Internet & Phone

Our Maximum Unlimited plan is our most popular Rural HighSpeed plan. When you choose Max + Unlimited, you receive the maximum speeds possible at your location. This could range from 10+ Mbps up to 100 Mbps. With all of our plans, many factors can affect Internet speeds, such as: geographic location, your Wi-Fi devices, router, and connection usage.

Our technicians will work with you, upon installation, to inform you what speeds you can expect and ensure that you are set-up to receive the best Internet experience possible.

About Basic Installation: Our basic installation involves mounting equipment on your roof or other suitable structure. If you are within "line of sight" of our transmission tower, this basic installation is all that is required. In some cases, however, modifications may be needed to receive our highspeed signal, such as installing an additional tower section, a rooftop tripod, or specialized mounting hardware. In all cases, of course, we will provide an estimate of any additional costs up front, with no obligation to you. Basic installation price is based on 24-month contract. Regular price is \$349. For seasonal plans, add \$5.00 per month. Ask for details. Not all plans are available in all areas. Prices are based on 24-month contract, are subject to change without notice, and do not include taxes, data overages, or long distance. Data used above plan quota will be billed at \$2.00/GB to a maximum of \$80.00 per month. Long distance rates are 4¢/minute. July 2026
